

SPEAKER BIOSKETCH

NAME, SURNAME : ANNA CHIOTI

**TITLE : Médecin / Chef de Division - Division de la Pharmacie et des Médicaments
Chargée de la création de l'Agence Luxembourgeoise des Médicaments et Produits de Santé**

Dr Anna Chioti is the Head of the Division of Pharmacy and Medicines within the Directorate of Health / Ministry of Health Luxembourg.

In this position, she is building the national regulatory capacity, while developing the legal and organisational framework of the future Agency for Medicines and Health Products of Luxembourg, focusing on innovative, adaptive and pragmatic regulatory schemes.

Medical doctor specialized in GP and in Public Health, with a Master in Business Administration, and a Master in European Legal Studies, her field of expertise ranges from general clinical practice & preventive medicine, public health & clinical research to pharmaceutical & regulatory affairs. Her career track includes clinical experience in ambulatory and hospital setting, as well as several years in the pharmaceutical industry and in academic/public research.

Born Greek and Danish and educated in Belgium, she lives in Luxembourg since 2010, where she developed the Clinical and Epidemiological Investigation Centre within the Luxembourg Institute of Health. She managed to build a well-established research unit, bringing in expertise in pharmaceutical and regulatory affairs, while managing numerous clinical research projects, in oncology, infectious diseases, nutrition, diabetes or cardiology. Before joining the Ministry of Health, Dr Chioti was leading the Department of Population Health of the Luxembourg Institute of Health. She is also involved in several national healthcare strategic groups, boards of several professional and scientific societies in Luxembourg and internationally. Since 2022, Dr Chioti is the chair of the Science and Innovation panel of the EU Innovative Health Initiative.

NAME, SURNAME: DOUNIA BOUZID

TITLE: Chargée de recherche biomédicale sur les produits de santé – Health Directorate

Dounia Bouzid is a biomedical research professional with over twelve years of experience at the intersection of clinical research, medical technologies, and regulatory science. She holds a PhD in Health and Life Sciences, as well as two master's degrees – one in Biomedical Engineering and another in Medical Physics & Imaging. She also earned a University Diploma in Applied Statistics for Clinical Research, which reinforced her expertise in data interpretation and evidence-based evaluation within the biomedical field.

Throughout her career, she has worked on a broad range of clinical and technological projects, from early-stage research to regulatory evaluation. Her experience spans both the pharmaceutical industry and public research. She also participates in several European initiatives focused on combined studies and patient engagement in clinical trials.
